

# Custom Software Dev for Software Dev Company

## PROJECT DETAILS

 Custom Software Development

 Apr. 2022 - May. 2022

 \$10,000 to \$49,999

“  
*"Their project management style is good considering the urgent state that the project is in."*

## PROJECT SUMMARY

Facile Technolab Pvt Ltd has developed custom software for a software development company. The team has created a complex mapping and design tool module as well as added new features.

## PROJECT FEEDBACK

Thanks to Facile Technolab Pvt Ltd's engagement, the client is able to demonstrate a functional prototype to their end client that has received positive feedback. The team has executed an effective project management style. They are prompt and communicative in the partnership.

## The Client

Please describe your company and your position there.

I am the CEO of ZYGADOX a cutting edge software development & innovation company focused on automation, personal branding & employability and design technologies.

**Dan Grant**  
CEO, ZYGADOX

**IT Services**

**Melbourne, Australia**

## The Challenge

For what projects/services did your company hire Facile Technolab Pvt Ltd, and what were your goals?

We needed a DNN expert who could get things up and running quickly and complete work on a complex mapping and design tool module. We had to add new features to these very complicated modules within a matter of weeks.

### CLIENT RATING

**5.0**

Overall Score

Quality: 5.0

Schedule: 5.0

Cost: 4.0

Would Refer: 5.0

## The Approach

How did you select Facile Technolab Pvt Ltd and what were the deciding factors?

I had already been through 4 vendors who promised they could handle the project, each developer wasted weeks of my time until Facile Technolab Pvt Ltd took over and proved they were the right people for the job when they completed my first request within a couple of days.

Describe the scope of work in detail, including the project steps, key deliverables, and technologies used.

Configure a local DNN development environment and get all custom modules up and running with little to no help from previous developers. Integrate complex geospatial data and work with Google Maps API to make the data useful. Help with Windows Server 2019 configuration and permissions issues.

How many people from the Facile Technolab Pvt Ltd team worked with you, and what were their positions?

There were 2 people involved in the project but I only dealt with Prashant who performed most of the development and managed the Vue developer.

## The Outcome

Can you share any measurable outcomes of the project or general feedback about the deliverables?

We were able to demonstrate a working prototype to our client which they demonstrated to their prospects with amazing feedback and praise about what we had achieved on the project. And how much time a system like this will save them (we are talking big government clients, transportation and mail houses).

**Describe their project management style, including communication tools and timeliness.**

Their project management style is good considering the urgent state that the project is in.

**What did you find most impressive or unique about this company?**

The responsiveness and communication were extremely refreshing and the depth of knowledge around .NET, Angular, C# and DNN was life-saving for us.

**Are there any areas for improvement or something they could have done differently?**

Could have been a little more cautious with the changes we made on the server as they had undesired repercussions that caused some websites to have problems. But they helped fix them really fast once alerted to them.
